Allowable Subject Matter

1. Claims 24-36, 41-54 and 62-69 are pending and are allowed.
2. The following is an examiner's statement of reasons for allowance:

The closest prior art of Dieffenderfer (US 5,910,930) teaches a clock and power management subsystem within the microprocessor contains clock generation and control logic and a power-down mode register. The register is controlled by the register control logic in the microprocessor and determines the powered-down mode of various hardware units that make up the microprocessor.

In regarding to independent claims 24, 32, 41, 45, 50 and 62, Dieffenderfer taken either individually or in combination with other prior art of record fails to teach or suggest a memory device comprises an input to receive control information that specifies a transition from the standby power mode to an active mode, wherein a sense operation is performed during the active mode, and wherein a row of the memory cells is sensed during the sense operation.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
